Education

Bachelor of Technology in Computer Science

Dwarkanadas J. Sanghvi College of Engineering

May 2026

GPA: 9.26/ 10.00

Experience

Dorf Ketal

Research Intern

November 2025 – March 2026

Mumbai, Maharashtra

- Developed LawMedioAI, a RAG-based legal assistance platform using **ChromaDB** and **BAAI/bge-small-en-v1.5**, embedding legal data into 109 vector chunks.
- Built a **YOLOv8n** accident severity classifier on **582 scraped images**, achieving **75.4% accuracy** with **0.7 ms/image** inference speed.

Oggntech

Full-Stack Web Developer

July 2024 – September 2024

Mumbai, Maharashtra

- Developed responsive educational web applications based on client requirements using **Figma** and the **MERN stack**, ensuring seamless integration and user-friendly interfaces.
- Optimized **MySQL** queries, integrated **APIs**, and collaborated with cross-functional teams to enhance frontend design and overall application performance.

Projects

Sentinel XAI | NLP, Explainable AI, DistilBERT, SHAP, LIME, React.js, Flask, Hugging Face

 [GitHub](#)

- Developed a **DistilBERT**-based fake job detector achieving **98.85% accuracy** and **82% recall**, enhanced with **SHAP** and **LIME** explainability, and deployed the model on **Hugging Face**.
- Built a **React.js** and **Flask**-based web platform with **cosine similarity**-driven resume-job matching and ranking for personalized job recommendations.

ZevEx | XLM-RoBERTa-Large, Transformers, Hugging Face, Python, NLP

 [GitHub](#)

- Built a Q&A-based event extraction model using **XLM-RoBERTa-Large (SQuAD2)** to identify Event Actor, Type, and Reason, achieving **F1: 80.7%** (Gujarati) and **82.9%** (Marathi) via zero-shot transfer.
- Benchmarked multilingual models (**XLM-RoBERTa-Base**, **IndicBERT**) and proved **XLM-RoBERTa-Large** most effective for cross-lingual event extraction in low-resource Indian languages.

Noteng | React.js, Tailwind CSS

 [GitHub](#)

- Developed the frontend using **React.js** and **Tailwind CSS** for Noteng, building reusable, responsive, and accessible UI components.
- Implemented secure authentication and login/logout functionality, enabling seamless access to notes, videos, and competition resources.

Technical Skills

Languages: C, Java, JavaScript, Python, CSS, HTML, SQL

Frameworks/Libraries: React.js, TailwindCSS, Express.js, Node.js, Next.js, TensorFlow, Keras, PyTorch, Transformers, Hugging Face, NLTK, Scikit-Learn, Pandas, NumPy, Seaborn, Matplotlib, Flask, Spring Boot

Databases: MySQL, MongoDB

AI/ML and Gen AI: Retrieval-Augmented Generation (RAG), YOLOv8, LLMs, Explainable AI (SHAP, LIME)

Co-Curriculars

DJ Unicode

Frontend Web Developer Mentee

Sept 2023 – July 2024

Mumbai, Maharashtra

- Built responsive web applications using **React.js** and **Tailwind CSS**.
- Mentored juniors at HackPrep in **HTML**, **CSS**, **JavaScript**, and **React.js**.

Achievements

Winner – Women Who Code Full-Stack DXP Hackathon (2025)

March 2025

Winner

Mumbai, Maharashtra

- Won 1st Prize among 360+ participants for developing MentorHer, an AI-powered mentorship platform using **Next.js**, **Flask**, **MongoDB**, and **Gemini LLMs** for intelligent mentor matching.
